

1. Verify the package contents.

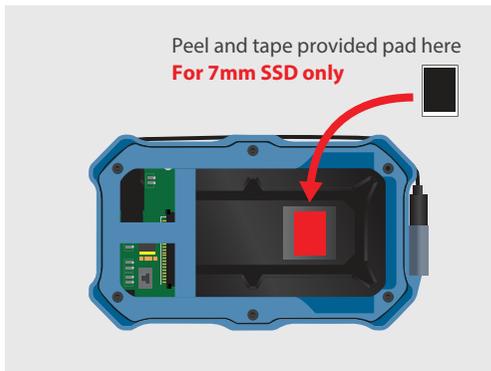

2. Parts Layout.

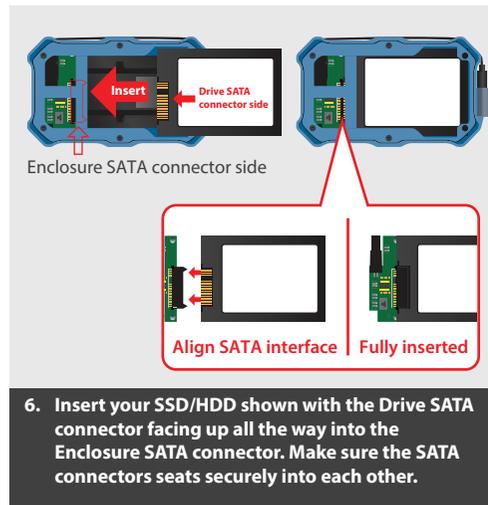

3. Turn to the back and remove the six screws holding the back cover.

4. Pry along the red edge shown above to remove the back cover.

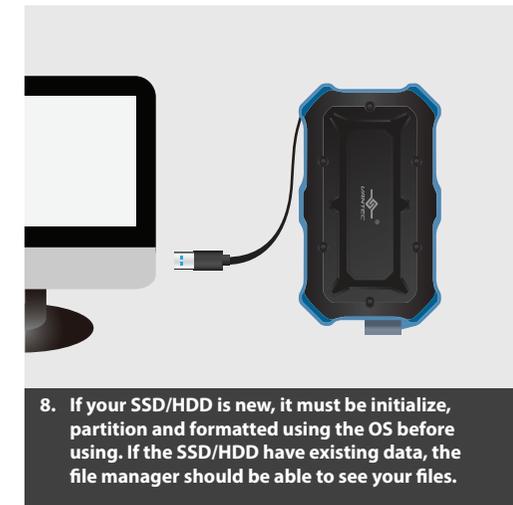

5. If you are using 7mm drive like a SSD, tape the provided pad shown above.

6. Insert your SSD/HDD shown with the Drive SATA connector facing up all the way into the Enclosure SATA connector. Make sure the SATA connectors seats securely into each other.

7. Place cover back securely to provide a tight seal and secure with the six screws.

8. If your SSD/HDD is new, it must be initialize, partition and formatted using the OS before using. If the SSD/HDD have existing data, the file manager should be able to see your files.
