

smOOovie™
POCKET VIDEO
STABILISER

Four Steps to do!

Before you start to shot/record

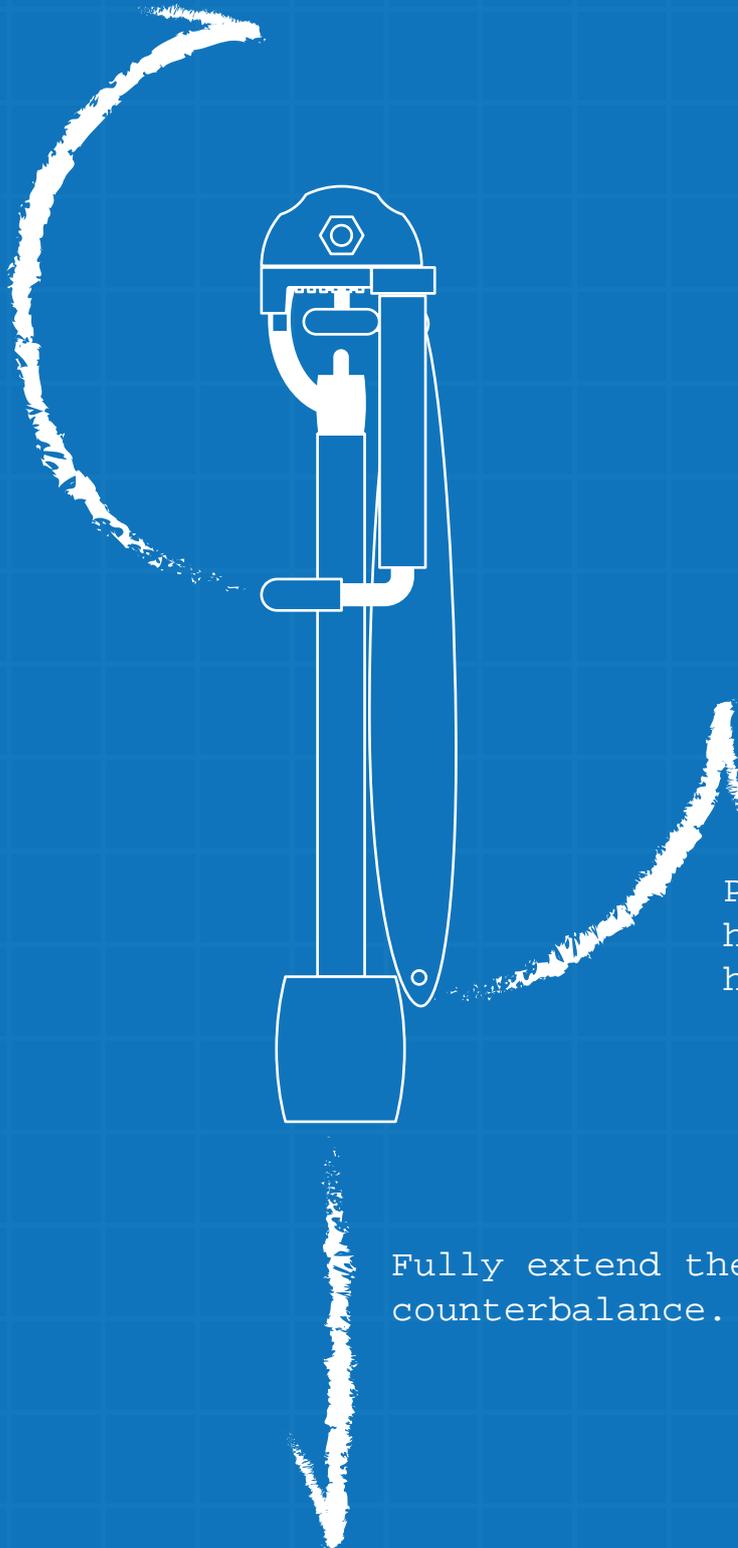

1. Unfold your Smoovie

Thank you for buying the Smoovie - a stabiliser that helps you create smoother videos and movies. For best results practise, practies, practise.

Smooth hand motions work best with any stabiliser - starting and stopping actions should be slow and gradual.

Flips the holder 180° to unfold it.

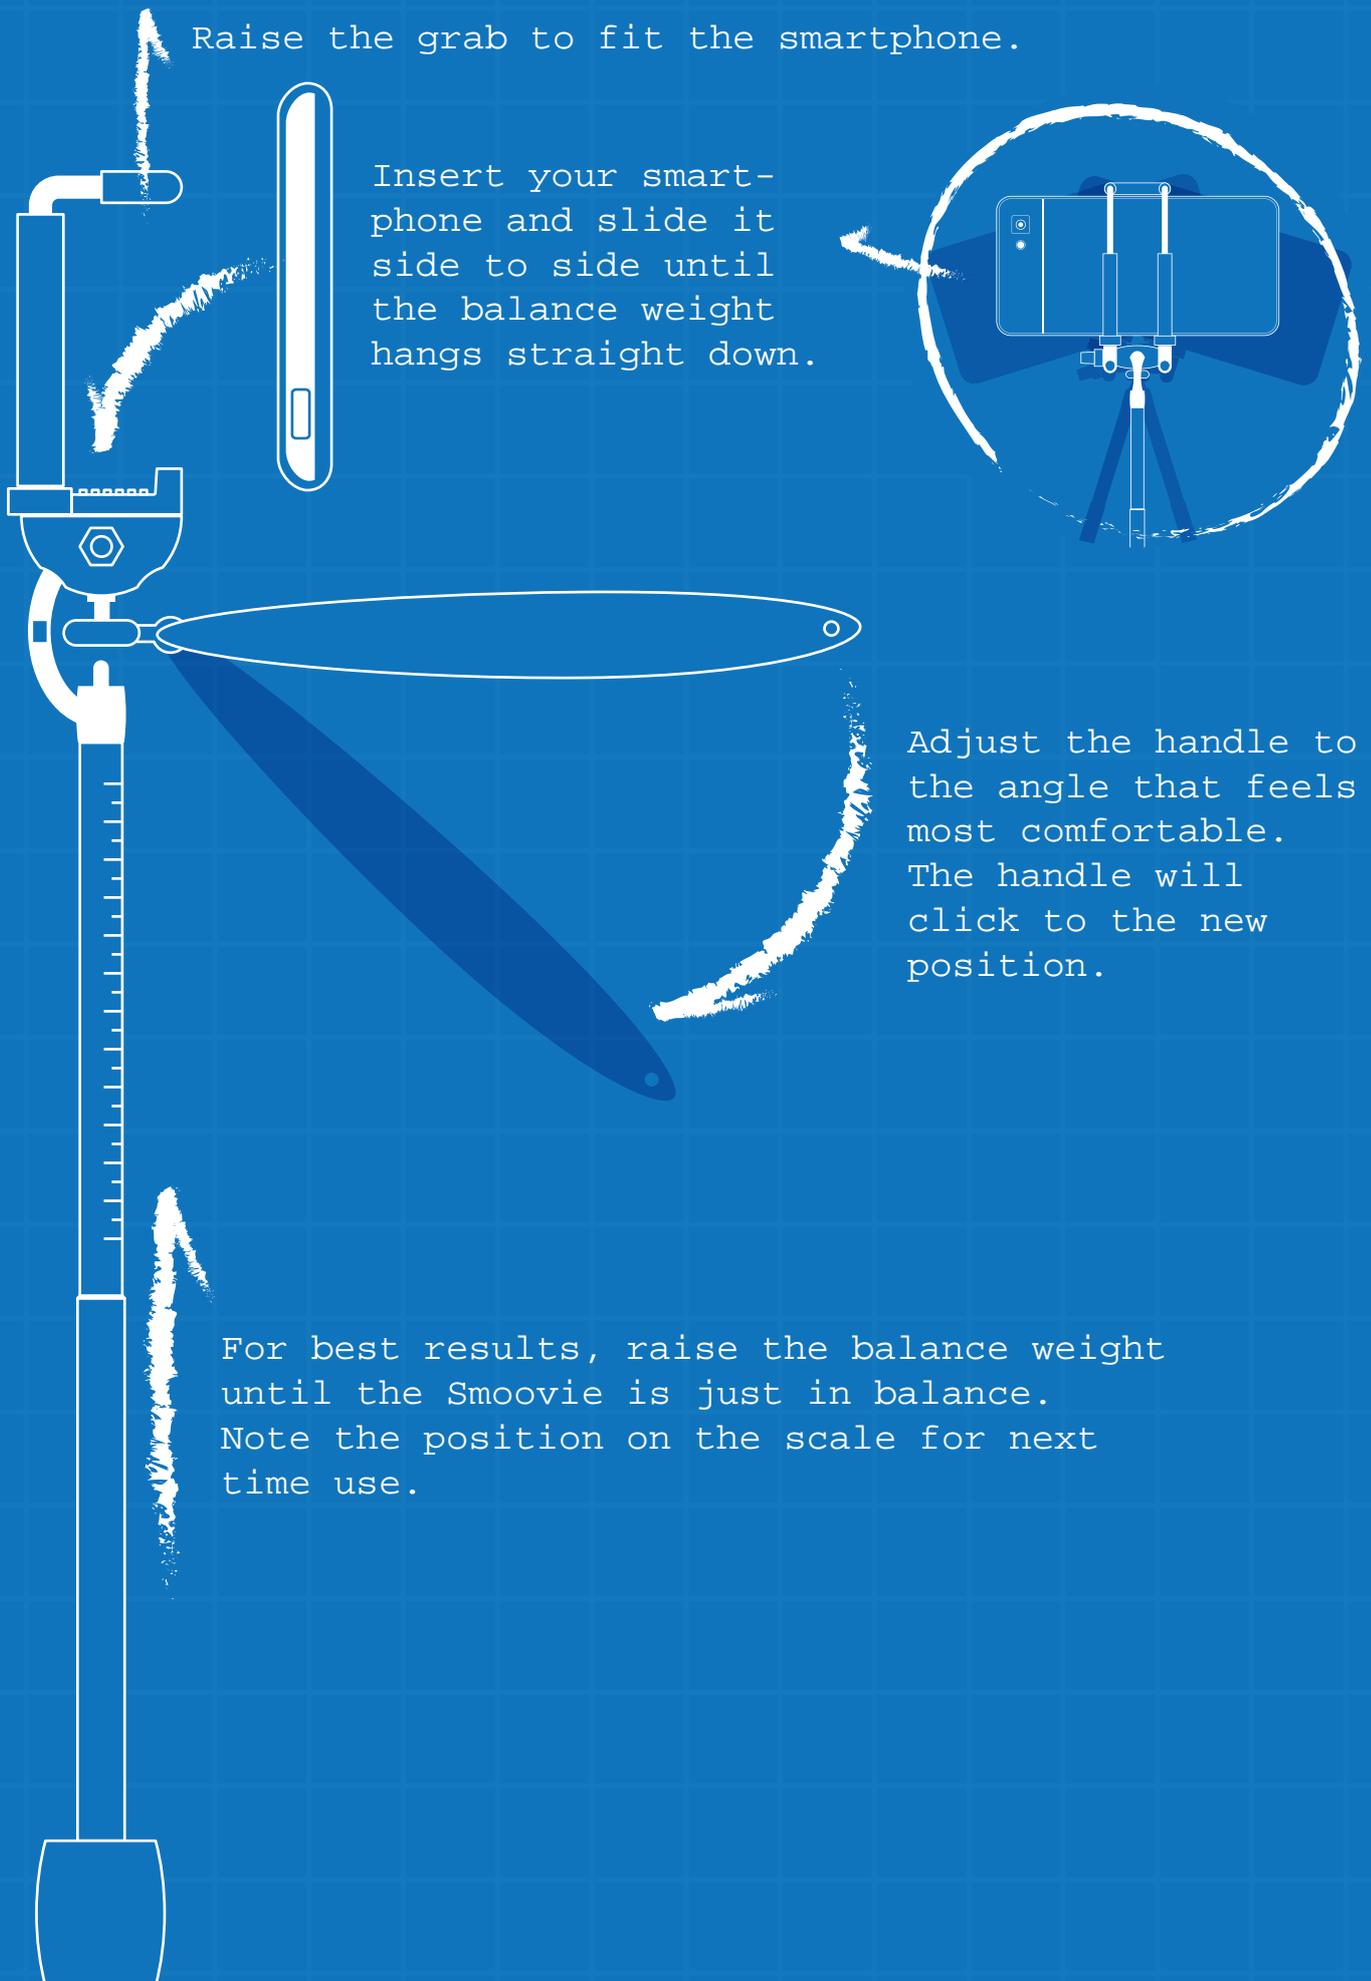

Pulls the handle to horizontal.

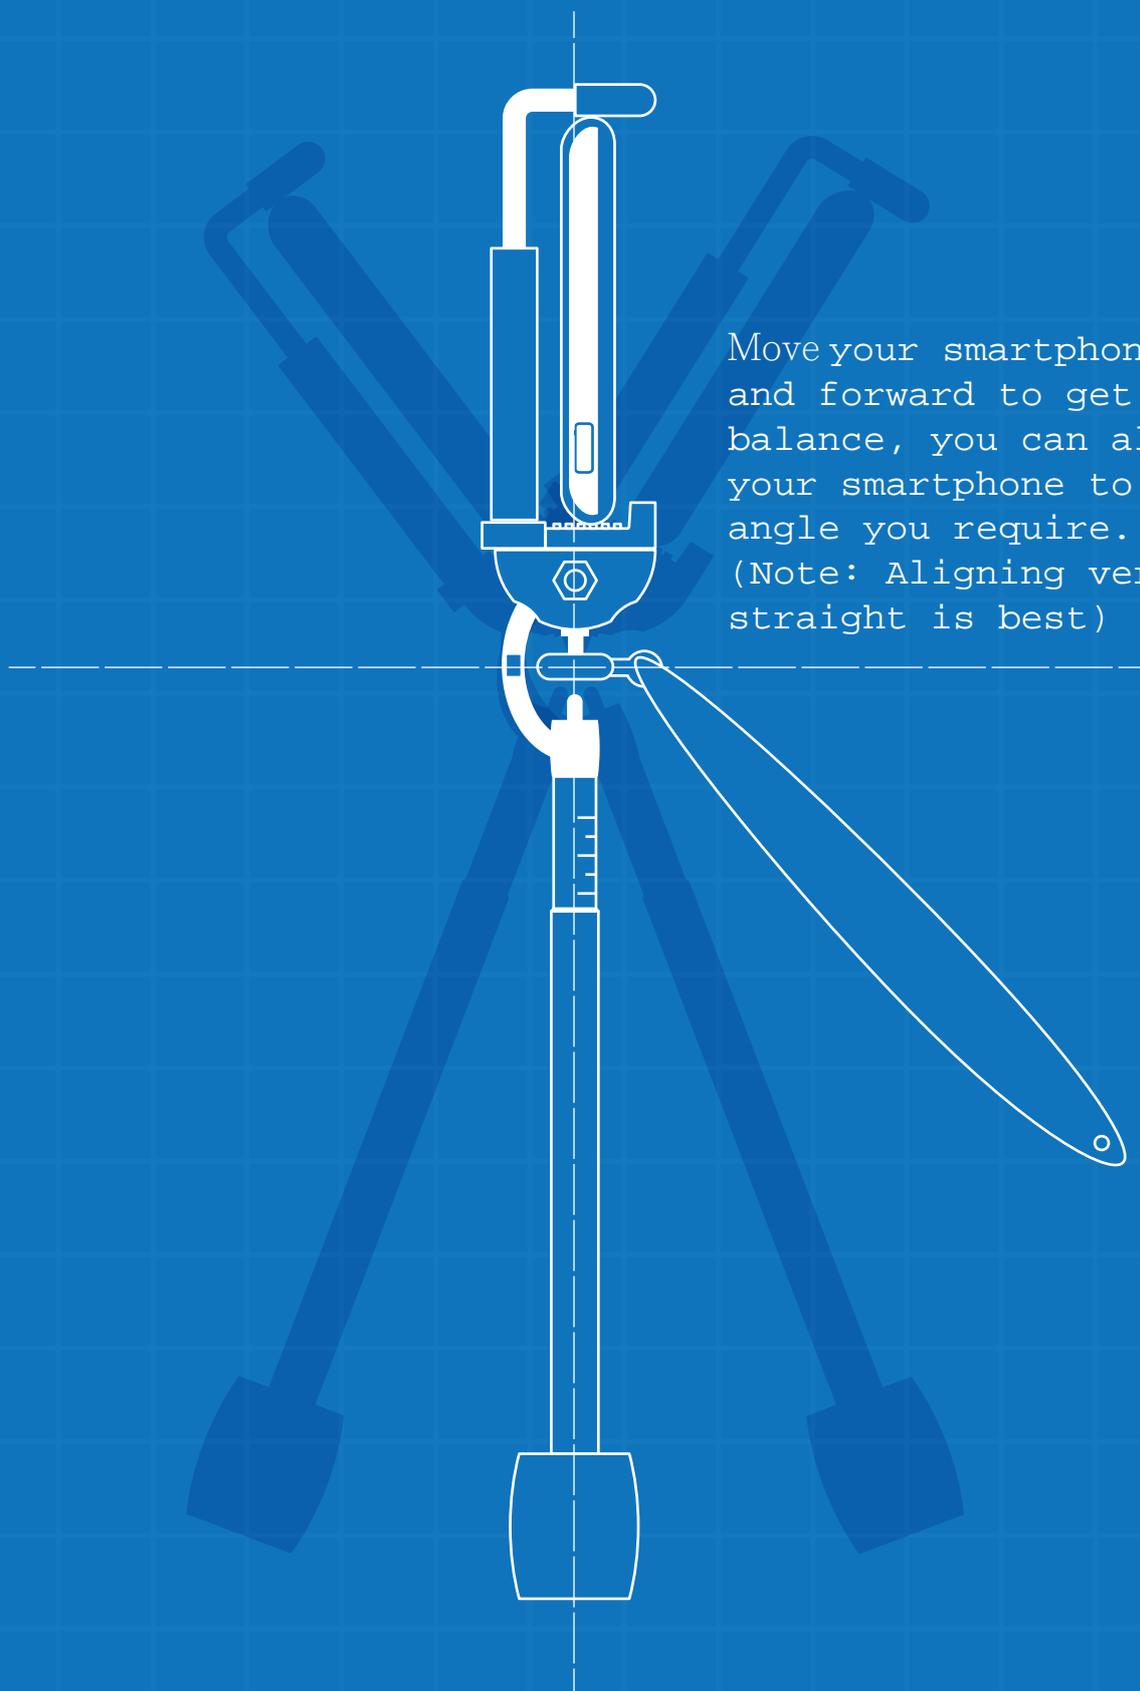

Fully extend the counterbalance.

Set up and troubleshooting videos can be viewed on YouTube. Search the channel "VantecTV" on YouTube and you can see all product tour and teaching video.

2. Insert the smartphone

3. Get balance

Move your smartphone back and forward to get the balance, you can also tilt your smartphone to the angle you require.
(Note: Aligning vertically straight is best)

4. It's ready to GO!

For mounting with the GoPro or selfie stick please check the manual or YouTube.

Search the channel "VantecTV" on YouTube and you can see all product tour and teaching video.
